PROEJECT

1_WORKWAVE

Workwave is a multidisciplinary freelancing platform developed by a team using the MERN stack. I contributed by building the backend, real-time chat, and payment systems

2_KEYBOX ELEARN

This digital solution aims to enhance the educational system in Algeria. Developed during a hackathon, I primarily worked on the backend, with additional contributions to the front-end

3_NEXUS DEPARTMENT APP

A mobile application that allow to manage the nexus club security departments , members , managers and events . I was member of the team responsible for the backend side .

4_GYM EXERCISES

I collaborated with a friend to create a digital solution that provides comprehensive details on different gym exercises with details using FastAPI data

5_FARMER WEBSITE

This digital solution addresses logistics challenges in Algeria's agriculture sector. Built during a hackathon, I focused on developing the front-end

6_MOVIES APP

Enhanced movie app featuring advanced film filtering, detailed movie information, and links to watch films when available. Built using a free film API.
